

SE 4th Street Railroad Underpass Moore, Oklahoma

Client:

City of Moore
301 N. Broadway
Moore, OK 73160

Client Contact:

Todd Jenson
Assistant City Manager
Ph: 405.793.5200

Project Team:

David Streb, P.E.
Tommy Evans, P.E.

The City of Moore selected Poe & Associates to perform engineering services and analysis for the SE 4th Street Railroad Underpass. The City of Moore has experienced tremendous delays on SE 4th Street (SH-37) due to many trains crossing 4th Street on the extremely busy BNSF line through the heart of Oklahoma. Poe's tremendous local large project experience and railroad experience made them the perfect firm to design this underpass on an extremely expedited schedule.

Poe will perform all engineering and analysis required to perform environmental clearance, survey, geotechnical investigation, roadway and bridge plans, construction bid documents, and construction inspection services for the proposed new 4th Street and BNSF railroad grade separation.
