Under this contract with the City of Tulsa, Poe & Associates has completed 13 projects since 1995 including patching of both concrete and asphalt distresses, cold milling, asphalt overlays and complete reconstruction of over 130 centerline miles of residential streets. Two more recent representative projects include:

Non-Arterial Street Maintenance: Project 144311 (2015 - 2016)

Major paving rehabilitation in street maintenance zone 3011. Repairs consist of new concrete pavement and curbs, extensive storm sewer and waterline improvements and driveway replacement.

Non-Arterial Street Maintenance: Project 144754 (2017 - 2018)

Major paving rehabilitation in street maintenance zone 7054. Repairs consist of new asphalt pavement and curb and gutter, asphalt milling and overlay, extensive storm sewer and waterline improvements, sidewalk and ADA improvements and driveway replacement.
