

Program Management Experience Throughout the State of Oklahoma

Poe & Associates, Inc.

OKLAHOMA DEPARTMENT OF TRANSPORTATION

Capital Improvement Program (CIP)

In 1997, Poe & Associates was selected to provide project management and consulting engineering services for Division IV of the Oklahoma Department of Transportation that included nine counties beginning with the Oklahoma City area and continuing north to the Kansas state line. Throughout the ODOT CIP, Poe designed 18 construction projects in Division IV. In addition to design, this work included right-of-way acquisition, utility relocations, and environmental clearances. The total cost of the CIP in Division IV was \$175 million.

Corridor Plan Program

The Poe & Associates Oklahoma City office provided program management for the Oklahoma Department of Transportation Corridor Plan Program. Poe provided management and oversight for \$503 million in transportation projects across Oklahoma.

OKLAHOMA TURNPIKE AUTHORITY

Consulting Engineer

From 1994 to 1997, Poe & Associates served as Consulting Engineer to the Oklahoma Turnpike Authority and provided a wide variety of highway and bridge designs for the turnpike system throughout the State of Oklahoma.

OKLAHOMA CITY AIRPORT TRUST

Consulting Engineer

From 1995 through 2000, Poe & Associates served as the Consulting Engineer for facility maintenance with the Oklahoma City Airport Trust. In this capacity, Poe was responsible for architectural and engineering projects at Will Rogers World Airport, the Mike Monroney Aeronautical Center, Wiley Post Airport, and C.E. Page Airport. In addition to routine project design and construction phase services, Poe also prepared an annual reports on facility needs with budgets and schedules. During this six year period, Poe handled more than 150 separate projects.
