

**BOUNDARY SURVEY
KANSAS DEPARTMENT OF WILDLIFE AND PARKS
GREENWOOD COUNTY, KANSAS**

This survey was conducted to re-establish the boundary of a tract of land near Fall River Reservoir in Greenwood County, Kansas. This tract of land, located on the hills, above the east side of the reservoir, was held by the U.S. Army Corps of Engineers. The USACE determined this tract to be excess land and was interested in transferring ownership to the Kansas Department of Wildlife and Parks. Poe's survey provided a legal description and an accurate acreage for the land transfer.
