

**A.R.R.A. - Maize Road: Pawnee to Kellogg**  
**City of Wichita**  
**Wichita, Kansas**  
Poe & Associates, Inc.

**Construction Cost:** \$3.3M

**Completion:** In progress

**Description:** Poe & Associates provided complete survey and design services for widening Maize Road from Pawnee to Kellogg to five lanes. Maize Road was comprised of a two lane roadway with deep ditches for the south half mile and a two lane roadway with curb and gutter for the north half mile. An in depth storm sewer analysis was required with extensive grading to facilitate neighborhood drainage. Poe & Associates adapted the plans quickly midway through the project as the project was changed from City of Wichita financing to American Recovery and Reinvestment Act financing. The Poe team displayed their flexibility and determination by delivering a quality set of plans for a complex project in a timely manner. The City of Wichita gained more than three million dollars because this project was finished in time to be included in the A.R.R.A. program.
