

**18" WATER MAIN REPLACEMENT & 30" WATER MAIN EXTENSION
CITY OF OKLAHOMA CITY
OKLAHOMA CITY, OKLAHOMA**

***CONSTRUCTION COST: \$1.79M
COMPLETION: 2011***

The City of Oklahoma City selected Poe & Associates for a water main replacement and extension project at W. Reno Avenue in Oklahoma City. This project replaced 1,000 linear feet of existing 18" water main on the overhead utility structure crossing the North Canadian River between Council Road and Morgan Road on the north side of Reno Avenue. Also included in the project was the construction of approximately 1,000 linear feet of 30" water main that connects to the 18" water main on the east and west sides of the North Canadian River. This connection to the 18" water main provides an additional conduit crossing the North Canadian River and allowing the existing 18" main to be shut down for any future major repairs.
